Historic Property Owner’s Guide updated in 2019.

This program receives Federal Financial assistance from the National Park Service. Under Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, the Americans With Disabilities Act of 1990, and South Dakota law SDCL 20-13, the State of South Dakota and the U. S. Department of the Interior prohibit discrimination on the basis of race, color, creed, religion, sex, disability, ancestry or national origin. If you believe you have been discriminated against in any program, activity, or facility as described above, or if you desire further information, please write to: South Dakota Division of Human Rights, State Capitol, Pierre, SD 57501, or the Office for Equal Opportunity, U. S. Department of the Interior, Washington, DC 20240.

Introduction

Historic Preservation is saving the physical materials that make a building, object or site significant to a community and its culture. This sense of community and the artifacts of its past can educate this generation, as well as the future generations, about the lessons of the past. Preservation is a partnership between the private sector, federal, tribal, state and local governments.

Preservation has gone through its own growing stages. In the beginning preservationists considered only grand buildings as significant. In more recent years, however, they are examining entire neighborhoods that contain both high style and vernacular or common buildings.

Federal governmental involvement began in 1906 with passage of the Antiquities Act, which provided protection to federally owned prehistoric and historic sites. This national policy was enhanced through the Historic Sites Act of 1935. The act empowered the Secretary of the Interior through the National Park Service to survey, document, evaluate, acquire and preserve both publicly and privately owned historic sites. But, the big push for federal organization and regulatory control did not come into being until 1966, with passage of the National Historic Preservation Act. This act established State Historic Preservation Offices, the National Register of Historic Places and the Advisory Council on Historic Preservation.

State Historic Preservation offices administer federal programs for the National Park Service through grants-in-aid from the revenue of offshore oil leases. These activities include the National Register, conducting historical and archeological site surveys, monitoring federal projects, and providing technical assistance and incentive programs. The **National Register of Historic Places** recognizes significant national, state and local properties. In South Dakota the statewide historic preservation office is the **State Historic Preservation Office** in Pierre.

The South Dakota State Historic Preservation Office (SHPO) is located in the Cultural Heritage Center in Pierre

The **Advisory Council on Historic Preservation** provides advice to the President of the United States and to Congress. The Council's most visible activity is reviewing and commenting on proposed federal undertakings. Under the National Historic Preservation Act federal agencies must evaluate the impact of projects on properties listed in or eligible for listing in the National Register of Historic Places. These agencies must then seek comment on undertakings from both the State Historic Preservation Office and the Advisory Council.

The National Register of Historic Places

The National Register of Historic Places is the nation's official list of cultural properties worthy of preservation. It recognizes a variety of historic or prehistoric resources that have local, statewide or national significance. National Register listing can enrich local preservation efforts by publicly recognizing local properties that are significant enough to merit national recognition. This program is central to a number of federal programs that encourage protection and improvements of historic properties.

National Register listings include buildings, structures, objects, sites or districts containing any combination of thematically related types. Properties eligible must meet three basic tests: age, significance and integrity. In terms of age it should typically be at least fifty years old.

To meet the second test for significance a property must satisfy at least one of four official criteria (A through D on following page). A property must be proven to be historically or architecturally or archaeologically significant to be listed in the National Register.

Finally a property must have integrity of location, design, setting, materials, workmanship, feeling and association to a sufficient degree that it still accurately represents the history of the place and its context.

Unless special circumstances exist, the following categories are not ordinarily eligible for listing: cemeteries, birthplaces or graves of historical persons, religious properties, relocated properties, reconstructed historic buildings, commemorative properties and properties that have achieved significance within the last fifty years.

Parties that wish to nominate a place to the National Register should request forms and instructions from the State Historic Preservation Office. Upon return of the completed nomination materials, the Office staff will edit the forms, arrange a site visit if necessary and prepare accompanying documentation. Each nomination must be reviewed by the Board of Trustees of the State Historical Society at one of its periodic meetings. If the board approves a nomination, documentation is sent to the National Park Service for final review.

Examples of Properties Listed under the National Register Criteria

Criteria

Significant properties are those:

- A. That are associated with events that have made a significant contribution to the broad patterns of our history or
- B. That are associated with the lives of persons significant in our past or
- C. That embody the distinctive characteristics of a type, period or method of construction or that represent the work of a master or that possesses high artistic values or represent a significant and distinguishable entity whose components may lack individual distinction or
- D. That have yielded or may be likely to yield information important to history or prehistory.

The Richards Cabin in Perkins County was listed under Criterion A for the role it played in the settlement and homesteading of South Dakota.

Examples of Properties Listed under the National Register Criteria

The Pyle House in Huron was listed under Criterion B for its association with Gladys Pyle, the first woman elected U.S. Senator.

The Nichols Building in Rapid City was listed under Criterion C as an example of Colonial Revival architecture.

The Turtle Effigy in Hughes County was listed under Criterion D for the archaeological potential it may yield.

What National Register Listing Does

- Identify and evaluate significant buildings, structures, sites, objects, and districts according to the established National Register Criteria.
- Make the public aware of historic resources by documenting their importance.
- Provide information about historic resources that can be used as a planning tool for federal, state, local and private agencies.
- Expedite the review of federal undertakings that could affect historic resources and attempt to mitigate adverse effects on identified historic properties.
- Make owners of historic properties eligible for federal grants for preservation projects, when such funds are available.
- Enable income-producing depreciable historic properties to use tax incentives when rehabilitated according to the Secretary of the Interior's Standards.
- List resources on private property only if they meet the National Register criteria and the owner, or a majority of owners, agree to the listing.
- State law provides that the State Historic Preservation Officer review projects which encompass governmental funding, licensing, permit, and many other forms of involvement. SDCL 1-19A-11.1

What National Register Listing Does Not Do

- Limit or restrict the rights of property owners to use, develop, or sell their historic properties; require that historic properties be maintained, repaired or restored; or require that historic properties be open to the public.
- Provide markers or plaques for listed properties. Owners may purchase plaques and markers if desired.
- Automatically facilitate local landmark designation or local district zoning. Nor does it require the review of state, local, or privately funded projects that could affect historic properties.
- Automatically stop federal undertakings that could affect historic resources.
- Assure that owners of historic properties will receive grants when funds are available.
- Provide state or local tax benefits or low-interest loans to owners.
- List historic properties according to local criteria or if the private owner or majority of private owners object to the listing.

Secretary of the Interior's Standards

The National Park Service has published Guidelines and many supplemental guidance documents to help property owners interpret the *Standards*. SHPO staff can help identify relevant documents for projects under consideration. See also the list of available Preservation Briefs on page 24 in this publication.

There are four treatment approaches for historic buildings: Preservation, Rehabilitation, Restoration, and Reconstruction.

Secretary of the Interior's *Standards for the Treatment of Historic Properties with Guidelines for Preservation of Buildings*

Preservation is defined as the act or process of applying measures necessary to sustain the existing form, integrity, and materials of an historic property. Work, including preliminary measures to protect and stabilize the property, generally focuses upon the ongoing maintenance and repair of historic materials and features rather than extensive replacement and new construction. New exterior additions are not within the scope of this treatment; however, the limited and sensitive upgrading of mechanical, electrical, and plumbing systems and other code-required work to make properties functional is appropriate within a preservation project.

Standards for Preservation

1. A property shall be used as it was historically, or be given a new use that maximizes the retaining of distinctive materials, features, spaces, and spatial relationships. Where treatment and use have not been identified, a property will be protected and if necessary, stabilized until additional work may be undertaken.
2. The historic character of a property will be retained and preserved. The replacement of intact or repairable historic materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Work needed to stabilize, consolidate, and conserve existing historic materials and features will be physically and visually compatible, identifiable upon close inspection, and property documented for future research.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.

Secretary of the Interior's Standards

5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. The existing condition of historic features will be evaluated to determine the appropriate level of intervention needed. When the severity of deterioration requires repair or limited replacement of a distinctive feature, the new material will match the old in composition, design, color, and texture.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archaeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures shall be undertaken.

Secretary of the Interior's *Standards for the Treatment of Historic Properties with Guidelines for Rehabilitation of Buildings*

Rehabilitation is defined as the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural or architectural values.

Standards for Rehabilitation

1. A property will be used as it was historically, or be given a new use that requires minimal change to its distinctive materials.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.

Secretary of the Interior's Standards

6. Deteriorated historic features will be repaired rather than replaced. When the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archaeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures shall be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.
10. New additions and adjacent or related new construction will be undertaken in a such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Restoring Buildings

Restoration is defined as the act or process of accurately depicting the form, features, and character of a property as it appeared at a particular period of time by means of the removal of features from other periods in its history and reconstruction of missing features from the restoration period. The limited and sensitive upgrading of mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a restoration project.

Standards for Restoration

1. A property will be used as it was historically, or be given a new use, which reflects the property's restoration period.
2. Materials and features from the restoration period will be retained and preserved. The removal of historic materials or alteration of features, spaces and spatial relationships that characterize the period will not be undertaken.

Secretary of the Interior's Standards

3. Each property will be recognized as a physical record of its time, place, and use. Work needed to stabilize, consolidate, and conserve materials and features from the restoration period will be physically and visually compatible, identifiable upon close inspection, and properly documented for future research.
4. Materials, features, spaces, and finishes that characterize other historical periods will be documented prior to their alternation or removal.
5. Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize the restoration period will be preserved.
6. Deteriorated features from the restoration period will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials.
7. Replacement of missing features from the restoration period will be substantiated by documentary and physical evidence. A false sense of history will not be created by adding conjectural features, features from other properties, or by combining features that never existed together historically.
8. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
9. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures shall be undertaken.
10. Designs that were never executed historically will not be constructed.

Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Reconstructing Buildings

Reconstruction is defined as the act or process of depicting, by means of new construction, the form, features, and detailing of a non-surviving site, landscape, building, structure, or object for the purpose of replicating its appearance at a specific period of time and in its historic location.

Secretary of the Interior's Standards

Standards for Reconstruction

1. Reconstruction will be used to depict vanished or non-surviving portions of a property when documentation and physical evidence is available to permit accurate reconstruction with minimal conjecture, and such reconstruction is essential to the public understanding of the property.
2. Reconstruction of a landscape, building, structure or object in its historic location will be preceded by a thorough archeological investigation to identify and evaluate those features and artifacts, which are essential to an accurate reconstruction. If such resources must be disturbed, mitigation measures will be undertaken.
3. Reconstruction will include measures to preserve any historic materials, features, and spatial relationships.
4. Reconstruction will be based on the accurate duplication of historic features and elements substantiated by documentary or physical evidence rather than on conjectural designs or the availability of features from other historic properties. A reconstructed property will re-create the appearance of the non-surviving historic property in materials, design, color and texture.
5. A reconstruction will be clearly identified as a contemporary re-creation.
6. Designs that were never executed historically will not be constructed.

Preservation Tax Incentives

Preservation Incentives

Contact the South Dakota State Historic Preservation Office to apply for the following programs:

* **Federal Tax Credits**

In 1976, Congress passed the Tax Reform Act. This was the first time economic inducements were offered to potential investors to preserve historic buildings. These federal tax credits are available only for income-producing property. The tax benefit program is governed by several rules that must be followed to take advantage of investment tax credits. Those rules are **Secretary of the Interior's Standards for Rehabilitation**. Accompanying them are guidelines, which further define and illustrate the standards.

* **Property Tax Moratorium**

In 1982, South Dakota enacted legislation to provide for an eight-year property tax moratorium on historic properties that have been rehabilitated. This moratorium applies to both income-producing (commercial) and private (residential) property. The same standards that are used for the federal tax credit are used for the state moratorium.

Summary of State Property Tax Moratorium

The South Dakota Legislature has provided for certain property tax benefits for the rehabilitation of historic structures in SDCL 1-19A-20. If a historic building qualifies for the tax benefit, an eight-year moratorium is placed on the property tax assessment of certified improvements. Property tax assessments may not be increased due to certified rehabilitation of the building.

The state property tax benefit may be utilized by the owner of any certified historic structure, including private residences. To be eligible, the property must be:

1. On the State or National Register of Historic Places.
2. Restored or rehabilitated according to the Secretary of the Interior's *Standards for Rehabilitation of Historic Places*.
3. Certified for tax exemption by the South Dakota State Historical Society's Board of Trustees
4. Encumbered with a covenant attached to the deed of the property for the life of the moratorium guaranteeing the continued maintenance and protection of the building's historic features for the life of the moratorium.

Preservation Tax Incentives

Application for certification is made by the property owner, who submits a completed application form and supporting documents to the State Historical Society's State Historic Preservation Office (SHPO) in the calendar year that work is undertaken. A Restoration Specialist at the SHPO reviews the application and supporting documentation and any potentially controversial items are discussed with the owner.

A staff recommendation is made to the State Historical Society's Board of Trustees, who makes the final determination of certification based on whether the work meets the Secretary of the Interior's *Standards for Rehabilitation*. If the Board of Trustees issues a certificate of eligibility for the moratorium, the property tax assessment of certified rehabilitation work is frozen as of January 1 of the year in which the certification is granted and carries forward for a total of eight years.

Although formal application for certification is made after work on the building is completed, **it is strongly suggested that the owner/developer/contractor submit plans and specifications for a proposed project to the SHPO prior to beginning work**. A Restoration Specialist can review the proposed rehabilitation and assist owners to interpret the Secretary's *Standards*. Prior to beginning work, non-conforming portions of a plan can be discussed by the owner and SHPO staff in order to bring about conformance. It can be costly and difficult (sometimes impossible) to correct work that is not conformance with the *Standards for Rehabilitation* after work has begun.

Through the SHPO's financial incentives, \$7.2 million in non-state funds was invested in South Dakota's historic buildings in 2017. In addition, over 5,500 jobs were created through preservation activities helping Heritage Tourism to account for \$320 million annually for the state's economy!

South Dakota SHPO & the SD Department of Tourism

IMPORTANT POINTS:

Certification is granted or denied by the South Dakota State Historical Society's Board of Trustees based on the Secretary of the Interior's *Standards*, which have been adopted by the board.

Any rehabilitation work on the building that is completed after the Board of Trustees grants official certification will not receive the moratorium unless a new application is made for the additional work. If rehabilitation cannot be completed in a single year, the owner should develop a plan which divides the work into separate and distinct phases that can be certified as they are completed.

Preservation Tax Incentives

The state property tax moratorium cannot be retroactively awarded. Applications must be submitted for approval in the calendar year that rehabilitation work is undertaken.

All tax certification applications submitted to the SHPO during any calendar year will be formally reviewed in December of the year they are received.

Applications should be submitted no later than November 1 to allow sufficient time for the application to be reviewed prior to the Board of Trustees meeting. Late applications will generally not be accepted.

The property must be listed on the State or National Register of Historic Places no later than the meeting at which the application for the moratorium is submitted.

The state property tax benefit is independent of and separate from any Federal tax benefits. There are application fees for this program.

Fee schedule:

\$30 fee for rehabilitation/restoration work less than \$4,000

\$55 fee for rehabilitation/restoration work \$4,000 to \$100,000

\$75 fee for rehabilitation/restoration work \$100,001 to \$500,000

\$100 fee for rehabilitation/restoration work \$500,001 or more

OWNER'S RESPONSIBILITIES:

In order for the property to retain its tax benefits, the owner must guarantee the public some benefit for the loss in tax revenue. This guarantee is in the form of a covenant, which binds the owner to the following:

1. The owner must maintain the property in good order and make alterations in a manner which conforms to restoration and rehabilitation standards, as defined by the State, for an eight-year period.
2. The owner must allow the public to view those portions of the project approved as tax-exempt work for at least twelve hours a year.
3. The owner must adequately insure the building against fire, and, if necessary, flood.

Preservation Tax Incentives

Checklist

- 1) Discuss your project with the State Historic Preservation Office staff prior to beginning any demolition or construction.
- 2) List the building on the National Register of Historic Places.
- 3) Follow the Secretary of the Interior's *Standards for Rehabilitation*.
- 4) Request certification from the State Historical Society Board of Trustees.
- 5) Attach a covenant to the property deed guaranteeing the continued maintenance and protection of the building's historic features for the length of the moratorium.

Summary of Federal Rehabilitation Tax Credits

What are the Rehabilitation Tax Credits? There is a 20% Investment Tax Credit (ITC) available for rehabilitating historic buildings. The ITC is based on a percentage of the rehabilitation costs and does not include the purchase price.

Note: this is a tax credit, not a deduction. Generally speaking, a tax credit is a dollar-for-dollar reduction in the amount of income tax owed.

Example: 20% of a \$50,000 rehabilitation = \$10,000 tax credit

Which Buildings Qualify? The Historic Rehabilitation Tax Credit (20%) is available for buildings listed in the National Register of Historic Places which, after renovation, are used for commercial or residential use. The tax credit is not available for the rehabilitation of a private residence.

What Rehabilitation Work Qualifies? Any work on the interior or the exterior of the building may qualify for the tax credit provided that it meets the Secretary of the Interior's *Standards for Rehabilitation*. Landscaping or new additions to the building do not qualify. The work on a historic building must be certified by the National Park Service (NPS). This is done by completing an application and submitting it to the NPS along with "before" and "after" photographs showing all work areas (interior & exterior). Applications must be submitted before the project is completed.

Preservation Tax Incentives

How Much Money Must be Spent in Order to Qualify for the ITC? The rehabilitation expenditures must exceed the greater of either the “adjusted basis” of the building or \$5,000. “Adjusted basis” is the purchase price minus the value of the land minus any depreciation already taken by the current owner of the building plus any capital improvements.

Example (recent purchase): \$60,000 (purchase price) - \$7,000 (land) = \$53,000 (adjusted basis); rehabilitation expenses must exceed \$53,000

Example (long-time ownership): \$60,000 (purchase price) - \$40,000 (depreciation) - \$7,000 (land) + \$5,000 (capital improvement) = \$18,000 (adjusted basis); rehabilitation expenses must exceed \$18,000

When Can a Rehabilitated Building be Sold? A building must be kept at least five years in order to avoid any recapture of the tax credit by the federal government. The recapture amount ranges from 100% of the tax credit if the building is sold within the first year to 20% of the credit if it is sold within the fifth year.

How Can I Apply? To obtain the 20% federal tax benefit the owner must file a completed application. **It is highly recommended that owners of historic buildings who are interested in this program submit an application very early in the planning stages of a project.** The highest approval ratings occur when proposed construction activity is discussed and negotiated before work is completed which could prevent approval. Applications are available from the State Historic Preservation Office.

Answers to Frequently Asked Tax Questions

What is Adjusted Basis?

Adjusted basis is the initial cost of the building for the present owner, minus depreciation, plus capital investment. Initial cost does not include cost of the land.

What buildings are eligible for Tax Benefits?

All buildings listed on the State or National Register of Historic Places are eligible to apply for the 8-year property tax moratorium. All depreciable (income-producing) buildings listed on the National Register are eligible to apply for the 20% investment tax credit.

Preservation Tax Incentives

Are the Tax Benefits automatically available?

No. These tax benefits are a privilege and can only be granted for projects that meet the Secretary of the Interior's *Standards for Rehabilitation*. Both tax benefits must be applied for by filing the appropriate application forms with the State Historic Preservation Office.

What benefits are available to private residences?

Only the 8-year property tax moratorium is available to private residences. The property tax moratorium and the investment credit can both be applied to commercial (income-producing) property.

Is it true that an owner may do anything to a building's interior?

No. Interior features that are historically or architecturally significant must be treated in accordance with the Secretary of the Interior's *Standards*. All work will be reviewed and must be documented.

Projects are evaluated in their entirety. All work must meet the *Standards* or projects will not be approved.

Preservation Tax Incentives

Foursquare

Are there other areas concern that owners should be aware of?

Areas of special concern are window repair or replacement, masonry cleaning, storefronts, interior spaces, additions and siding proposal. Any of the preceding will cause the projects to be closely reviewed.

What kind of assistance is available?

Although the State Historic Preservation Office staff will not do design work for buildings, they will answer technical preservation questions, review draft applications, make on-site visits and provide preliminary opinions and advice.

Deadwood Fund Grant

Deadwood Fund Grant Information Sheet

- The Deadwood Fund is created out of gaming proceeds from the City of Deadwood. The purpose of the fund is to make loans and grants to purchase, restore, or develop historic South Dakota properties for residential, commercial, or public purposes.
- Individuals, organizations, and public agencies sponsoring projects to retain, restore or rehabilitate historic buildings, structures or sites by returning them to a state of utility, through repair or alteration, which makes possible an efficient contemporary use while preserving those portions and features of the properties which are significant to their historic, architectural, and cultural values and meeting the grant criteria are eligible to apply for a Deadwood Fund grant. *In all instances, the burden of proving that funds will support work in historic preservation lies with the applicant.* Professional guidance by someone skilled in the retention, rehabilitation, and restoration of historic properties may be needed to successfully plan, implement, and complete a project. Evaluation criteria will be used as guidelines to rank each project. *Because this is a competitive grant, meeting all eligibility criteria does not guarantee that a project will receive a grant award.*
- A Deadwood Fund grant may be considered taxable income. In June 1997, the IRS began examinations of preservation grants in Colorado, and it claims that those grants are taxable income.
- Grants will generally be awarded in amounts ranging from \$1,000 to \$25,000.
- Applicants may be offered award amounts less than the amount requested. *Larger grant awards may be considered in extreme circumstances.*
- Generally, the grant amount requires a dollar-for-dollar match from nonfederal and non-state sources. The availability of matching funds must be provided with the application. Nonprofit organizations according to state law may receive grants without match; however, match is highly encouraged. Nonprofit organizations can also provide match in-kind.
- Payment of the grant award will be made on a reimbursement basis upon receipt of a paid invoice at the completion of the work. The matching funds must be demonstrated at the time of payments. The State Historical Preservation Office staff reserves the right to inspect completed work before payment.
- Projects should demonstrate substantial public historic preservation benefits. The fund will not pay for administrative or operating costs. The following categorical exclusions will not generally be funded with Deadwood Funds: security systems, general decorative arts and furnishings, general building or site maintenance, new construction or non-historic site improvements, and work performed only to meet the Americans with Disabilities Act and building codes.

Deadwood Fund Grant

Eligibility Criteria for the Deadwood Fund Grant

1. The property must be listed in or in the process of being listed in the National Register of Historic Places.
2. The project must meet The Secretary of the Interior's *Standards for the Treatment of Historic Properties* (36 CFR 68).
3. The applicant must demonstrate that funds are available to match the grant, and the property will have on-going use at the completion of the project for residential, commercial, or public purposes.
4. The applicant must provide assurances of the ability to maintain the property well into the future.
5. The applicant must sign an eight-year restrictive covenant running with the deed of the property, which states that the property shall be maintained in a manner that preserves the property's historic integrity. All work performed on the property within the covenant period must meet The Secretary of the Interior's *Standards for the Treatment of Historic Properties*.
6. A sign provided by the South Dakota State Historical Society must be posted at the project site. The sign will state that the project has been funded in part by the State Historical Society through the Deadwood Fund and must remain posted for the duration of the project. All publicity material should include similar recognition.

Application Deadlines

The Deadwood Fund Grant application deadlines are 1 February and 1 October of each year. Projects may not start until after the award is granted.

Preservation Briefs

Preservation Briefs are leaflets published by the National Park Service to provide information regarding appropriate preservation practices as described in the Secretary of the Interior's *Standards for Rehabilitation*. The following titles are available from the State Historic Preservation Office. Preservation Office Staff is available to answer specific technical preservation questions. You can view the briefs on the National Park Service's web page at <http://www.nps.gov/tps/how-to-preserve/briefs.htm>.

1. The Cleaning and Waterproof Coating of Masonry Buildings
2. Repointing Mortar Joints in Historic Brick Buildings
3. Conserving Energy in Historic Buildings
4. Roofing for Historic Buildings
5. Preservation of Historic Adobe Buildings
6. Dangers of Abrasive Cleaning to Historic Buildings
7. The Preservation of Historic Glazed Architectural Terra-Cotta
8. Aluminum and Vinyl Siding on Historic Buildings
9. The Repair of Historic Wood Windows
10. Exterior Paint Problems on Historic Woodwork
11. Rehabilitating Historic Storefronts
12. The Preservation of Historic Pigmented Structural Glass
13. The Repair and Thermal Upgrading of Historic Steel Windows
14. New Exterior Additions to Historic Buildings: Preservation Concerns
15. Preservation of Historic Concrete: Problems and General Approaches
16. The Use of Substitute Materials on Historic Building Exteriors
17. Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character
18. Rehabilitating Interiors in Historic Buildings
19. The Repair and Replacement of Historic Wooden Shingle Roofs
20. The Preservation of Historic Barns
21. Repairing Historic Flat Plaster – Walls and Ceilings

47. Maintaining the Exterior of Small and Medium Size Historic Buildings
48. Preserving Grave Markers in Historic Cemeteries
49. Historic Decorative Metal Ceilings and Walls: Use, Repair, and Replacement
50. Lightning Protection for Historic Buildings

Maintenance Checklist for Historic Properties

Restoration may make up for years of neglect, but there is no substitute for an active maintenance program. The best way to do this is to establish a written schedule outlining each area that needs to be checked and a time schedule as to how often this needs to be done. Almost every home owner will attest to the old adage: the sooner a problem is identified and repaired, the less it will cost in time and materials in the future. For most owners, a walk around the building once in the spring and once in the fall is enough.

FOUNDATION

- Evaluate overall site drainage – is it sloping away from the building?
- Assess overall condition of crawlspace
- Look for water seepage or discoloration of exterior material
- Identify broken stones or concrete and evaluate and monitor its deterioration
- Locate and monitor cracks in joints – if possible identify the source
- Identify and correct problems that arise from one material staining another
- Clean and disinfect areas where fungus has begun to grow

METAL

- Locate and monitor stress fractures
- Clean rust or corrosion no matter how small – paint immediately after cleaning

GLASS

- Monitor all joints and stress fractures in stained glass
- Monitor the fit of the stained glass window and the individual pieces of glass
- Monitor the effectiveness of the glazing compound

ROOF

- Locate and monitor loose shingles
- Evaluate the ridge line – if not straight, locate the source of the problem
- Monitor the gutter hangers and keep them free of debris
- Monitor all valley flashing
- Monitor chimney brick, mortar, and flashing

PAINT

- Evaluate the overall condition of painted surfaces
- Identify potential problems and monitor deterioration

Maintenance Checklist for Historic Properties

- PLASTER**
 - ___ Monitor cracks and locate source of the problem

- PIPING**
 - ___ Locate and correct leaks, excessive sweating or corrosion
 - ___ Clean out traps

- FIRE PROTECTION**
 - ___ Test smoke alarm
 - ___ Examine anchors of exterior escape ladders

- ATTIC**
 - ___ Examine insulation for settling, water damage or air leaks
 - ___ Clean out vents

State Law: SDCL 1-19A-11.1

1-19A-11.1 Preservation of historic property - Procedures. The state or any political subdivision of the state, or any instrumentality thereof, may not undertake any project which will encroach upon, damage or destroy any historic property included in the National Register of Historic Places or the State Register of Historic Places until the Office of History (SD State Historical Society) has been given notice and an opportunity to investigate and comment on the proposed project. The office may solicit the advice and recommendations of the board with respect to such project and may direct that a public hearing be held thereon. If the office determines that the proposed project will encroach upon, damage or destroy any historic property which is included in the National Register of Historic Places or the State Register of Historic Places or the environs of such property, the project may not proceed until:

- (1) The Governor, in the case of a project of the state or an instrumentality thereof or the governing body of the political subdivision has made a written determination, based upon the consideration of all relevant factors, that there is no feasible and prudent alternative to the proposal and that the program includes all possible planning to minimize harm to the historic property, resulting from such use; and
- (2) Ten day's notice of the determination has been given, by certified mail, to the Office of History. A complete record of factors considered shall be included with such notice.

Any person aggrieved by the determination of the Governor or governing body may appeal the decision pursuant to the provisions of chapter 1-26. The failure of the office to initiate an investigation of any proposed project within thirty days from the date of receipt of notice thereof is approval of the project.

Any project subject to a federal historic preservation review need not be reviewed pursuant to this section.
