

## Seed Mosaic Magnet

Materials: 1 three-inch cardstock circle    1 bag corn kernels    1 bag sunflower seeds    1 bag soybeans    1 magnet    1 glue stick

Note: Seeds are not food-grade quality. PLEASE DO NOT EAT THEM

1. Remove the paper from the sticky side of the magnet. Rub the sticky side of the magnet on the glue stick and glue it to one side of the cardstock circle.

2. Turn the cardstock circle over. There are two options for applying the seeds to the circle:

OPTION 1: Pour a few seeds out of each bag and design the pattern you want. Rub each seed on the glue stick and glue to the circle. Let the glue dry about 5 minutes before moving the circle.

OPTION 2: Rub glue on the circle. Sprinkle seeds onto the glue. Let dry 5 minutes before moving.
